

**Boost your efficiency and save money!**

*It is a fact that many companies in the current financial climate have had to reduce their work force. Leaving the remaining employees to help increase efficiency... With a Logitrans product as a Partner, this can increase the performance of the employees and will assist the company in saving money! How? See below...*

**Why choose Logitrans? A large Danish customer answers here:**

“Our material handling has a very high priority! The Logitrans products give us the safe and efficient handling of our plastic components, when carrying our components from one workstation to another. With an efficient material handling system we

avoid wasted time and increase our efficiency. At the same time we focus much more on finding the equipment, ensuring that our employees get the best possible working conditions, such as correct working heights and minimum strain on back, arms

and shoulders.”

*Jan Madsen,  
Technical Manager,  
Lynddahl Plast A/S*

**Buy Logitrans – buy efficiency...**

When using Logitrans products, the arranging of the individual workstations becomes very flexible due to the mobility of the equipment. As an example the components can be placed near the process machines and working tools - and this saves time for the individual employee. The components required are always at hand. This increases

The high manoeuvrability of the Logitrans products makes it possible to operate in very confined areas and aisles. Production and storage can be organised in smaller areas and intra-logistics carried through very efficiently!

Are the employees protected from inconvenient movements? Do they lift heavy and unwieldy goods manually? Are they overloaded?

Many Logitrans products can handle various objects. With only one product it is often possible to manage several work operations and the employee avoids interruptions and wasted time!

the efficiency of the individual employee considerably and optimises the space utilisation!

However, whilst focusing on the most convenient and efficient organisation of the workflow, it is also very important to keep the working conditions of the employees in mind!

All the Logitrans products are designed to make intra-logistics as efficient as possible and at the SAME time ensure the employees have ergonomically correct working conditions!

**Focus on efficiency in the house of Logitrans...**

Also in the house of Logitrans we focus on efficiency! During the last couple of years we have implemented LEAN Thinking in our production. This has given

us a more reasonable and organised production flow and has boosted both efficiency and performance considerably! Over and over again the perfect

match between the Logitrans products and LEAN Thinking has become obvious to us!
